Knowledge

Html, Css, JavaScript, React.js, ReactNative, Next.js, Tailwind, Git, GitHub,

Projects

Audio Joy Web Store Next.js

I have created a fully operational online store (Audio Joy) using Next.js and Sanity.io technologies. This platform allows users to browse and add to the cart a wide variety of audio-related products, such as headphones, speakers, speakers and more. With an intuitive and friendly user interface, customers can easily browse the catalog, get detailed information about each product and make purchases quickly and securely. In addition, the combination of Next.js and Sanity.io ensures optimal performance and efficient management of site content, providing a smooth and enjoyable shopping experience for users. https://nextjs-audio-joy.vercel.app/

Cryptocurrency Quotation Website

I have developed a cryptocurrency quoting website using ReactContext and integrated an external API to display real-time quotes and up-to-date coin market statistics. https://ernesto-serna-crypto-quoter.netlify.app/

Personal website

Development of a personal website using Next.js present my professional profile and previous projects.

Certificaciones

The Web Developer Bootcamp 2023

Udemy • 2023

Trained to create, design and maintain functional, attractive and secure websites.

Aptitudes y habilidades

1. Learning capacity and adaptation
2. Teamwork and collaboration
3. Troubleshooting
4. Creativity and design

Education

Industrial Engineering, Tecnológico Nacional de México Campus Cd. Victoria.
